

## 5.5M VL-VUL-PL STARTING CABLE

### Description :

Booster cables with overvoltage protection The cables are ideal for 6V, 12V and 24V usage in workshops, garages and repair work. The booster cables can charge 12 or 24V batteries. The 4 insulated terminals are designed with additional contact surfaces for avoiding voltage loss. The clamps have extra strong grip on the contact points so there is no risk of falls and interruptions in the circuit.

L : 5,5m

Diam : 54,72mm<sup>2</sup>

CC max : 1000A
