

DIGITAL BRAKE BLEEDER

Description :

- Tank 10L.
- Connects to the vehicle's 12 V battery.
- 'High volume' 1.5 litre /min pump (open circuit, allowing fast brake fluid renewal).
- A vehicle battery can be integrated to make it stand-alone.
- Digital controls for accurate pressure settings (pitch 0.1 bar).
- Automatic depressurization when stopping the bleeder.
- Low level indication with automatic stop.
- 'BA' type warning indicating the battery is low.
- Lateral hose storage tab.
- Certificate of compliance issued at end of manufacturing (individual check).
- Storage tray covering the battery.
- Regulated pressure adjustable from 0 to 4 bar.
